Summary

Data Engineer with expertise in designing and optimizing large-scale ETL/ELT pipelines, cloud-native architectures, and distributed data platforms. Proficient in AWS, Databricks, Spark, and Airflow, with a proven record of delivering reliable, high-performance data infrastructure for millions of users. Currently pursuing a PhD in AI-driven healthcare applications. Fluent in English, with strong communication skills to support effective cross-functional collaboration.

Experience

- **Techcombank, Hanoi** *Nov 2022 – Present*
Data Engineer
 - Designed and maintained 150+ ETL/ELT pipelines across on-prem, cloud, and hybrid environments, handling initial loads, CDC, and backfills to ingest from 20+ internal/external systems into the data lake and serve downstream IT and partner platforms.
 - Contributed to the bank's AWS-based Data Lake and Databricks' Lakehouse architecture, ensuring enterprise-grade compliances and achieving >99.9% availability for large-scale business-critical datasets processed via batch, near real-time, and streaming workflows.
 - Optimized Spark-based workflows and storage strategies, reducing operational costs by up to 60% per pipeline.
 - Led cross-functional squads (up to 7 engineers) to deliver data products that support 10M+ retail customers. Played a key role in multiple strategic projects across domains such as retail, omni-channel, marketing, loyalty, lending, and risk management in Scrum/Agile methodology.
 - Tech stack: AWS (EC2, Lambda, Glue, S3, DynamoDB, Athena, EKS, CodePipelines, IAM), Databricks, Oracle, Terraform, Git/Gitlab, Airflow, Spark, Kafka, Docker, Jenkins, GraphQL.
 - Languages: Python, Scala, Java, SQL.
- **FPT Software, Hanoi** *Jun 2021 – Jan 2022*
Data Engineer
 - Developed and automated ETL pipelines to consolidate data from Jira, Trello, and Planner into a unified Azure-based data warehouse.
 - Contributed to schema design and data modeling for high-availability analytics systems.
 - Implemented CI/CD pipelines and DevOps workflows using Azure DevOps, Docker, and Git, improving release efficiency and reliability.
 - Tech stack: Azure Databricks, Blob Storage, Synapse Analytics, Airflow, Spark, Hadoop, Hive, MinIO, Presto, Docker.
 - Languages: Python, SQL.
- **Revotech Software, Hanoi** *Jun 2020 – Jan 2021*
Software Engineer Intern
 - Developed and tested full-stack web applications using Node.js, PHP, and modern frameworks (React.js, Laravel).
 - Delivered technical documentation and coordinated with senior developers to align feature delivery with client requirements.

Education

- **Vietnam National University, Hanoi – International School** *Sep 2022 – 2026*
PhD Candidate, Informatics and Computer Engineering
Focus: AI in Healthcare.
Tech stacks: MATLAB, Scikit-learn, Tensorflow, PyTorch, Numpy, Scipy, Optuna.
- **Vietnam National University, Hanoi – International School** *Aug 2018 – Jul 2022*
Bachelor's in Informatics and Computer Engineering (Top 3 in cohort, graduated 1 year early).
GPA: 3.30/4.00.

Certificates

- AWS Certified Solutions Architect – Associate (2023).
- Google Data Analytics and Project Management Specializations.

- Agilearn's Agile Project Management.
- English Proficiency: CEFR B2.
